To
All Regional Managers
A.P.S.R.T.C.

Sub: **COMPUTERS** - Effective implementation of modules on Depot Computerisation Project - Touring of depots by Regional Core Group Members - Reg.

-0O0-

In the review meeting held at Head Office on 10-8-2001 by Executive Director (MIS) & Chief Engineer (IE&C) with the Regional Core Group Supervisors, it is brought to our notice that some of the Regional Managers are not ensuring the preparation and circulation of the monthly depot tour programme of the Regional Core Group Supervisors to oversee the implementation of various Software modules developed by Head Office in DCP. With the result, some of the important DCP modules such as crew allowance, group incentive scheme, tyres modules, generation of incentive targets through DCP, vehicle wise / service wise profitability etc., are not fully implemented at most of the depots.

In order to ensure effective implementation of the DCP modules and to have first hand feed back from the depots, the Regional managers are advised to chalk out the tour programme of the Regional Core Group Supervisors in such a way that they should camp at each depot of the Region one day in a week. At the depot, they should physically check the following aspects arid give feed back to the DVM/RM for corrective action.

1.Ensure dust free environment in computer room.

2.Generation of outputs through OLTAS/DOLTAS.

3.Generation of outputs through VEMAS & STOINS.

4.RMIS Project/Modem Status.

5.Monitoring Hardware / Software problems.

6.Installation of terminals in depot stores, wherever sanctioned.

7.Implementation of TIMS and its proper functioning.

All the Regional Managers are requested to send monthly depot tour programme of the Regional Core Group Members to the depots in advance and ensure its execution for effective implementation of DCP.

The proper functioning of the depot computer systems and implementation of DCP are being reviewed regularly by ED(MIS) and VC & MD.

Please acknowledge receipt and ensure implementation of the above instructions.
