Sub: OLIMS - Deletion of Master Records

from Tables - Reg.

£D
P
Mus
hira
bad:
:Hy
der
aba
d.

Of late it is observed that the Master Records were deleted from the Master Tables like Item Master,. Vendor Master etc. by the System Supervisors on the instructions from the JSO/SSO, for one or other reasons at ali Zonal Stores. Due to deletion of such records from the database, the transactions pertaining to *dekied reevrds* cant be retrieved *and this deletion is also against the rule of normalization of Data*. While enforcing the Data Integrity constraint in the OHMS Database, the Referential Integrity could not be enforced on most of the tables *due to non-availability* of Master Records.

Hence, all the SSO/JSOs working in Stores and Purchase Department are instructed not to advise the System Supervisor to delete any type of records from the database. If any such requirement arises at Zonal Stores, they are advised to contact the Computers Department for data archiving.

R Any violation of these circular instructions will be viewed seriously.
