Office of the VC & MD
Mushirabad, HYD
Dt. 10.12..2012.

To
All Regional Managers
APSRTC.

Sub:- **DCP-VEMAS:** (TYRES TRANSFER THROUGH SOFT COPY)-Transfer of tyres from one depot to other through soft copy –Implementation of software - Reg.

At present, there is no facility for deletion of tyre data from the tyres master, when ever the tyres are transferred from one depot to other depot or tyres transferred along with vehicles Similarly when the tyres are received along with vehicles from other depots, tyres ADCs are not entering the tyres into tyre master properly due to which tyre mileage are not posted correctly.

To avoid the above problem, computers department has developed a program to send / receive the tyres through softcopy. While sending the tyres to other depot, the program will delete the tyres from tyre master of parent depot and will write a softcopy which is to be sent to receiving depot along with 68B of tyres.

Tyres receiving depot has to down load the tyres softcopy to data directory. To insert the tyres in to tyre master, tyres insertion program to be used. The program transfers the tyres along with tyres history. Now manual tyre deletion and insertion is restricted. The detail procedure of implementation of above program is given in the file "modifications.vemas" which is available under "RTCWAN" /tptobj/vemas directory.

Hence all the Regional Managers are requested to give necessary instruction to the Depot Managers to implement the above program in all depots.
