CIRCULAR NO. 6/99-OPD (C): DATED: 4.2.1999

27

Sub: POWER AUDIT: Power Consumption in Bus Stations -
Steps to be taken to minimise expenditure on
Electricity Consumption - instructions issued -
Regarding.

Corporation is incurring huge expenditure towards electricity consumption. It is observed that electricity is being consumed indiscriminately without any check on its use. Corporation has incurred nearly Rs.1500 crns towards electricity consumption charges for the year 1997-98, which is on high side. This is one of the areas where we can control expenditure at this critical juncture. Steps to control consumption of electricity shall be immediately initiated in Bus Stations by regularly monitoring the expenditure.

Measures like switching off lights, fans etc. in Bus Stations specifically during such timings as and when there are no departures and arrivals of buses and in portions of Bus Stations not in use, shall be taken in order to curb wasteful expenditure on electricity consumption. However, bare minimum lighting should be provided in Bus Stations during nights.

Regular monitoring on this vital aspect of energy consumption shall be done, for marked reduction in expenditure incurred. The reasons for increase in electricity consumption if any over the previous year should be thoroughly analysed and immediate remedial steps be taken in order to arrest wasteful consumption of electricity.

Regional Managers shall review the consumption of electricity in the periodical meetings to create general awareness on this particular aspect among the Depot Managers and Supervisors.

Therefore all the Depot Managers / Asst. Traffic Managers and Bus Station Managers are hereby advised to bestow their personal attention and ensure that there is considerable reduction in the consumption of electricity in Bus Stations.

Please acknowledge.
